

RAJ HALDAR

Software Engineer — Full Stack Developer

+91-9563991540 — rajhalder8000@gmail.com

Portfolio: my-portfolio

Professional Summary

Software Engineer with hands-on experience building scalable web applications, backend services, REST APIs, Gateway(RUST) and AI-powered solutions. Experienced in developing production-level applications using JavaScript, React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, modern software engineering practices.

Strong understanding of software development lifecycle, debugging, database management, authentication systems, and problem-solving. Built CRM platforms, AI developer tools, real-time communication systems, and marketplace applications.

Professional Experience

YOFOREX AI — Software Engineer

Jan 2025 – Present

- Developed and maintained scalable software applications following modern software engineering practices.
- Designed REST APIs, backend services, authentication systems, and database workflows using Node.js and Express.js.
- Built CRM platform features including user management, dashboards, workflows, and business logic.
- Integrated third-party APIs and external services to improve application functionality.
- Debugged issues, optimized performance, and contributed to reliable production deployments.

FlexyMarkets — Software Developer

2025

- Developed full-stack application features with frontend, backend, and database integration.
- Implemented API communication, application workflows, testing, and deployment processes.

Key Projects

DevPilot AI - AI Developer Assistant

- Built AI-powered developer platform with secure backend architecture and API integration.
- Implemented authentication, user management, and AI service communication.

Chatty - Real-Time Chat Application

- Developed real-time messaging application using Node.js, Express.js, and Socket.io.
- Created authentication, messaging APIs, and real-time communication features.

Drive with Raj - Car Marketplace

- Developed MERN stack marketplace application with backend APIs and database models.
- Implemented authentication, image management, Firebase integration, and deployment.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, SQL, C

Frontend Development: React.js, Next.js, JSX, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, Middleware, Socket.io

Database: MongoDB, Firebase Firestore, Database Design, Data Modeling

AI & Integration: AI API Integration, OpenAI API, Third-party API Integration

Tools & Deployment: Git, GitHub, CI/CD, Render, Firebase Hosting, Deployment

Software Engineering: OOP Concepts, Data Structures Basics, SDLC, Debugging, Problem Solving, MVC

Training & Certification

Python Full Stack Software Training - Q-Spider

Completed training in Python Programming, OOP Concepts, SQL, Web Development, Backend Development, APIs, and Software Engineering Fundamentals.

Education

Bachelor of Technology - Information Technology

Maulana Abul Kalam Azad University of Technology (MAKAUT)

2025 — CGPA: 8.1/10
