### PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building **FinTech and trading platforms**, CRM systems, real-time applications and financial workflows. Experienced across **React, Next.js, TypeScript, Node.js, PostgreSQL, WebSockets** and production debugging, with practical exposure to **RTX5/MT5, FIX 4.4, trading accounts, market data, copy trading, KYC, wallets, deposits and withdrawals**. Strong in feature ownership, API integration, database troubleshooting, real-time systems and production-oriented engineering.

### PROFESSIONAL EXPERIENCE

#### YoForex

Kolkata, India

Web Developer — FinTech / Trading Platform

2026 – Present

- Developed and maintained FinTech CRM functionality covering **users, trading accounts, KYC, wallets, deposits, withdrawals, transactions** and administrative workflows.
- Built and improved trading-platform interfaces using **React, Next.js, TypeScript, Tailwind CSS** and reusable enterprise UI components.
- Worked with **PostgreSQL, Prisma, Redis, REST APIs and WebSockets** across CRM, trading and financial workflows; investigated database, API and connectivity failures.
- Developed trading analytics and journal functionality including **Win Rate, Profit Factor, Expectancy, Risk-to-Reward, Maximum Drawdown, trade notes, reports, CSV export and Monte Carlo simulation**.
- Worked with **RTX5/MT5-related trading infrastructure**, trading accounts, broker integrations, real-time market data, tick processing, OHLC candles and multi-timeframe chart functionality.
- Worked with **FIX 4.4 and WebSockets** for real-time market-data and trading-terminal functionality, including symbol switching and live chart updates.
- Investigated copy-trading execution issues involving **OPEN/CLOSE/MODIFY order lifecycle, queues, retries and reconciliation**; identified execution-state risks requiring resolution before live-fund readiness.
- Debugged production-oriented issues involving **HTTP 429/502, authentication, WebSockets, PostgreSQL, Nginx, gateway connectivity and environment configuration**.
- Worked across **Rust/Axum/Tokio, C++/Drogon, Node.js/TypeScript** components in gateway, API and trading-system integrations.
- Performed security analysis of client-trusted idle detection and identified the need for **server-side validation and trust-boundary enforcement**.
